- Physiology & behavior of electro-magnetic field energy
- Causes of EMF disturbance
- Induction mechanics
- EMF meters
- EMF health & Safety
- EMF & paranormal activity

Weather

- Warm & cold spots
- Mists & fogs
- Drafts & convection
- Humidity
- Barometric pressure
- Ambient & Infra-red thermometers
- Atmospheric conditions affecting illumination & sound

Investigation Considerations & Techniques

- Case considerations
- Site assessment
- Witness interview
- Techniques for audio recording
- Techniques for EMF usage
- Techniques for visual recording
- Hands-on equipment training

SHPS' unique investigator training program consists of six stand-alone training segments that can be tailored to meet your group's specific needs and interests. Training workshops are 1-2 hrs. ea. & include power point slide presentations, group exercises, & hands-on activities. Trainings are conducted by one of SHPS' knowledgeable senior investigators, & will soon be available in electronic format.
